Congratulations @DracarysFrank, you've completed this course!

What went well

Now, you have your slide deck deployed [here](#) and you've gone through the GitHub Flow.

Before I say good-bye, here's a recap of all the tasks you've accomplished in your repository:

- You learned about issues, pull requests, and the structure of a GitHub repository
- You learned about branching
- You created a commit
- You viewed and responded to pull request reviews
- You edited an existing file
- You enabled GitHub Pages
- You made your first contribution! 🎉

Lab2 <https://lab.github.com/githubtraining/uploading-your-project-to-github>

[github.com/DracarysFrank/github-upload/issues/5](#)

Congratulations @DracarysFrank, you've completed this course! 🎉

What went well

Before I say good-bye, I want to recap all the tasks you've accomplished. You:

- Learned what to do with an empty repo on GitHub 🌟
- Created a .gitignore and removed bulky binaries
- Used your favorite local tools to push existing code
- Set your code up in a GitHub repository 📁

What's Next?

Now that you've moved your Git repository to GitHub, managing your repository and adding collaborators are common next steps. Here are some recommended courses we think you might be interested in:

Congratulations @DracarysFrank, you've completed this course!

What went well

Before I say good-bye, here's a recap of all the tasks you've accomplished in your repository:

- You learned why merge conflicts happen
- You resolved a simple merge conflict
